

SCIENCE BEGINS WITH A QUESTION, NOT AN ANSWER

SCIENCE BEYOND CLASSROOM

Sparking Curiosity, Shaping Thinkers

INTRODUCING NSSR

ABOUT NSSR

*“Empowering Young Minds
Through Research”*

Registered under Company Act 2063

- **Nepalese Society of Student Researchers (NSSR) is a youth-led research organization registered under Company Act 2063.**
- **Fosters a culture of research, innovation and scientific collaboration among students in Nepal.**
- **Aspires to enhance academic excellence and make meaningful contributions to Nepal’s scientific and intellectual advancement.**
- **Creates a collaborative environment where students can explore, learn and contribute to science, technology and innovation.**
- **Built on the core values of Inclusivity & Accessibility, Collaboration and Excellence & Integrity.**

THE BIGGER PICTURE

WHERE DO STUDENTS GO AFTER SEE?

The science pathway narrows as education progresses.

AFTER SEE

Grade 11 · 2023/24

HIGHER EDUCATION

2023/24

Grade 11 Science and higher-education Science & Technology are different statistical categories and populations; comparison is indicative, not cohort-tracking.

**THE QUESTION ISN'T WHETHER STUDENTS ARE CURIOUS ABOUT SCIENCE.
IT'S WHETHER THEY GET ENOUGH OPPORTUNITIES TO CONTINUE.**

H-INDEX

NEPAL IS ALREADY PRODUCING RESEARCH.

THE NEXT CHAPTER IS GROWING IT.

Source: SCImago Journal & Country Rank (SJR), Country Rankings, 1996–2025 (all subject areas).

THE CURIOSITY IS ALREADY THERE.

The opportunity isn't.

Nepal is full of talented, curious young minds but research is still an overlooked part of student life.

was initiated with the belief that true learning begins with curiosity, and curiosity begins with students. Our motivation came from the realization that while Nepal is full of talented young minds, research is still an overlooked part of student life.

HOW WE STARTED

- Lack of Undergrad Research Culture.
- Bridging the Gap Between Students and Research Opportunities.
- Transforming Curiosity into Culture.
- NSSR began as a movement of curiosity and belief that every student has the potential to be a researcher if given the right environment and encouragement.

**WHY SCIENCE BEYOND THE
CLASSROOM?**

THE SYLLABUS HAS BOUNDARIES. CURIOSITY DOESN'T.

- **Help student see science beyond the textbook, in the world around them.**
- **Cultivate scientific curiosity and inquiry**
- **Nurture critical thinking and analytical reasoning**
- **Inspire careers in research and innovation**

SCIENCE DOESN'T STOP AT THE CLASSROOM DOOR.

- Explore topics that go beyond the textbook
- Ask questions and discuss ideas openly
- Meet with early career researchers
- No exams, no grades — just curiosity

THE PROCESS FROM LEARNING TO DOING

01

LEARN

Build foundational knowledge

02

QUESTION

Ask meaningful questions

03

EXPLORE

Investigate new ideas

04

INVESTIGATE

Analyze real evidence

05

DISCOVER

Uncover new insights

06

SHARE

Share your ideas

THE OUTCOME

WHAT WILL YOU GAIN?

- Ask better questions and think critically
- Discover paths beyond the syllabus
- Learn how to explore ideas independently
- Build confidence to discuss and present ideas
- See how research connects to future careers

THE DIFFERENCE

WHAT MAKES THIS DIFFERENT?

IN THE CLASSROOM

- Learn established knowledge
- Follow structured learning
- Apply what you know

BEYOND THE CLASSROOM

- Ask meaningful questions
- Explore unfamiliar problems
- Investigate what you discover

WHO WE ARE

HOW NSSR MAKES IT POSSIBLE

- **A youth-led research organization, registered under Company Act 2063**
- **Fosters a culture of research, innovation and collaboration**
- **Built on inclusivity, collaboration and integrity**

“Empowering young minds through research”

TRACK RECORD

ONE HOUR, REAL ROOMS.

Opening the session

A full house

The talk itself

BAGISHWORI SECONDARY SCHOOL · APEX LIFE SCHOOL · KANYA MANDIR SECONDARY SCHOOL

TRACK RECORD

WHAT THE HOUR LOOKS LIKE

60 MINUTES

Free for the school. Every material funded and prepared by NSSR.

OUR COLLABORATION APPROACH

FROM RESEARCH CONNECTIONS TO MENTORSHIP

➤ CONNECT WITH RESEARCH ORGANIZATIONS

NSSR builds partnerships with research organizations, research groups and research active communities.

➤ IDENTIFY RESEARCH EXPERTS

We Connect with researchers and professionals across disciplines, institutions and areas of expertise all around Nepal.

➤ CONNECT EXPERTS WITH STUDENTS

Create opportunities for students and college researchers to learn from and engage with experienced researchers.

➤ BUILD THE NSSR SCIENCE MENTOR COMMUNITY

Feature participating researchers as **NSSR Science Mentors** and highlight their expertise and contribution to student research at NSSR's official website.

STUDENT LEADERSHIP

NSSR College Representative

Selected +2 and undergraduate students will serve as NSSR College Representatives, acting as the bridge between NSSR, their institution, and students.

- **Connect:** Connect students with NSSR programs, research opportunities and communities
- **Coordinate:** Support the organization and coordination of NSSR activities within their institution
- **Lead:** Take an active role in hosting and facilitating student-focused programs
- **Represent:** Bring student interests, ideas and feedback back to NSSR

SUPPORT, RECOGNITION & OPPORTUNITY

- **Support:** Daily allowance for designated representatives facilitating approved science beyond the classroom activities
- **Recognition:** Certificates, acknowledgements and leadership recognition for meaningful contributions
- **Opportunity:** Pathways to research exposure, networking, collaboration, mentorship and future research activities

NSSR Student Researchers— Explore • Connect • Lead • Grow

STUDENT OWNERSHIP FROM AUDIENCE TO AUTHOR.

"You have sat in that hall. Now you are the one who opens it."

"A College Representative isn't a smaller version of an NSSR speaker, peers close the gap experts can't."

POTENTIAL IMPACT

ONE STUDENT. ONE COLLEGE.

A NATIONAL RIPPLE.

**One Representative changes their college.
Multiply that across every college, and you are
shifting how a generation relates to research.**

***Not a single event — a research culture where
curiosity is normal, not exceptional.***

TRACK RECORD

JUST STARTED WITH A FEW SCHOOLS.
HUNDREDS STILL WAITING.

HUNDREDS

of colleges still waiting

Every session so far has been run directly by NSSR's core team. That doesn't scale.

SCIENCE DOESN'T END WHEN THE CLASSROOM ENDS.

BRING IT TO YOUR COLLEGE.
